Dr. Jack L. Feldman
Associate Professor of Physiology
and Anesthesia
Northwestern University Medical School
Ward Memorial Building
303 E. Chicago Avenue
Chicago, Ill. 60611

Dear Dr. Feldman:

We have received and considered your letter of January 25 concerning the international symposium you are organizing for discussion of "Central Neural Production of Periodic Respiratory Movements".

I am pleased to report that The Council for Tobacco Research is prepared to offer you a grant of two thousand five hundred dollars (\$2,500) toward support of the conference. We understand that these funds will be used for partial reimbursement of travel expenses and residence fees at the meeting for invited speakers and session chairmen. No part is to be used for support of conference participants from private industry.

This Council's primary mission is support of laboratory and clinical research on medical problems, with emphasis on the etiology and pathogenesis of certain constitutional diseases. Hence our policy sharply restricts contributions for meetings and conferences to the special cases where the topic has high relevance to The Council's priority interests, especially conferences in which some of our grantees are participating or where one or more members of our scientific staff may be brought abreast of new ideas and developments.

We are gratified that Dr. Donald Ford, Associate Research Director will attend. If you find these conditions acceptable, we will proceed accordingly.

Sincerely yours,

Robert C. Rockett
